# norton™

Cyber threats have evolved, and so have we.

Introducing Norton 360 Deluxe. Powerful layers of protection from the ever-changing threats to your connected devices, online privacy and identity.

Your personal information has protection when sent or received through your devices both at home and on-the-go with bank-grade encryption from Norton Secure VPN. It helps block cybercriminals from accessing your personal information when connecting to any Wi-Fi, even public Wi-Fi.
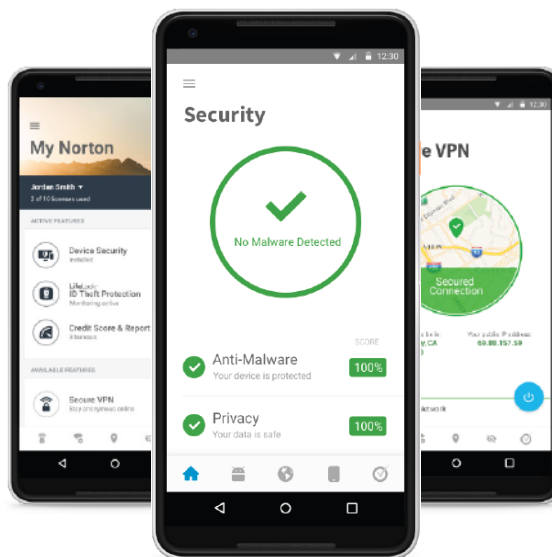

Norton 360 Deluxe

Device Security

In addition to real-time protection for up to 5 PCs, Macs®, smartphones, or tablets against ransomware, viruses, spyware, malware and other online threats, additional security features include Password Manager to securely manage passwords and credentials online, and Cloud Backup[1,2] to store and protect important files and documents.

Online Privacy

Worried about your online privacy? We've included Norton Secure VPN, a virtual private network service to encrypt your online activity, which is especially important on public Wi-Fi hotspots. We've also added PC SafeCam[1,2] to protect your computer's webcam from remote access attempts.

Dark Web Monitoring

Cybercriminals can meet anonymously on dark web sites to make illegal purchases of personal information. Dark Web Monitoring[3] continuously patrols the dark web and private forums looking for personal information. We send you notifications should it be found.

Screens are for demonstration purposes only.

Everyday activities like **online shopping, banking, and browsing** can expose your information, making you more vulnerable to cybercrime.

No one can prevent all cybercrime or identity theft.

Multiple layers of protection for your devices and online privacy.

Real-time threat protection for your devices

Multi-layered, advanced security helps protect against existing and emerging malware threats to your devices, and helps you protect your private and financial information when you go online.

Norton Secure VPN

Browse anonymously and securely with a no-log VPN. Add bank-grade encryption to help keep your information like passwords and financial details secure and private.

Password Manager

Easily create, store, and manage your passwords, credit card information and other credentials online – safely and securely.

Dark Web Monitoring

We monitor and notify you if we find your personal information on the dark web.[3]

50GB Cloud Backup

Automatic, secure cloud backup for PCs – to store and protect important files and documents against hard drive failures, stolen devices, and even ransomware.[1, 2]

Parental Control

Manage your child's activities online. Help them explore, learn, and enjoy their connected world safely. The School Time feature helps you manage your child's remote learning environment while school's in session.

Privacy Monitor

Your address and phone number can be easily found on the web. We scan common people–search sites to find your information, and help you request to opt-out.

System Requirements

Device Security
