SONICWALL®

Switch to SonicWall SMB Firewall Bundle

Grow your SMB base with our most budget-friendly TZ!

There's never been a better time to grow your business with SonicWall: For a limited time, when you or your customers trade in a competitor firewall, they'll be eligible for never-before-seen savings on a SonicWall TZ270 bundle!

We've made it easy to take advantage of the year's best deal on our most-budget-friendly firewall: Just provide the valid competitive details of the firewall when trading in at time of activation to enable services, then enjoy three years of our Essential Protection Service Suite — including Capture ATP with RTDMI™, GAV, Anti-Spyware, IPS, Application Firewall Services, CFS, Comprehensive Anti-Spam and more!

What Sets the SonicWall TZ270/TZ270W Apart:

The TZ270 offers enterprise-grade protection to even the smallest organizations. Our stronger, more secure and more agile Security Services offer low latency and no file size limitations, scanning every port, packet and protocol without impacting performance and then blocking until verdict.

With integration for Wireless APIs, WAN acceleration and switches, the TZ270 operates seamlessly. And starting with the TZ270's true zero-touch deployment, it does so simply — allowing centralized, single-pane-of-glass management from the cloud, all without the need for complex CLI programming.

Best of all, the TZ270's lower TCO goes far beyond savings on the purchase price. They'll also get a rock-solid high-availability (HA) option without the need to buy a separate license; reporting without additional fees or software; and IoT signature scanning without added cost.
